

PURESTREAM

PIPING

BY AIRCOM

Aluminum

For compressed air, Aluminum is the most appropriate material to deliver pressurized fluids. **PURESTREAM** has developed a wide range of quick mechanical fittings for the perfect connection of aluminum pipes.

AIRCOM is the only company in the compressed air industry, that is exclusively focused on specializing in the design and manufacturing of products for compressed air distribution systems. **PURESTREAM** offers a product range that gives you more variety than our competitors in the market.

The fittings are enameled die-cast aluminum alloy. They are available in the following diameter sizes: 20mm-25mm-32mm-40mm-50mm-63mm-80mm-110mm.
